**RIJKS MUSEUM**

A holistic approach opens up so many new opportunities & connections.

Basis is an integrated vision on Libraries, Archives, Museums (LAM's).

Cross-collection research and search is the ultimate ideal

which requires openness & standardisation

in a single institution, but preferably in many.

It is clear that - if electronic sources of information are to be effectively managed for future access by historians and others – **differences between libraries, archives and museums will largely have to disappear** and their different philosophies, functions, and techniques will be integrated in ways that are as yet unclear.'

W. Boyd Rayward (1998)

FIRST COLLECTION WEBSITE (2013)

RIJKS MUSEUM

#### Rijksmuseum

- Art belongs to everyone, our collection belongs to everyone
- Connects people, art and history
- Core values: simple, personal, authentic, quality, innovative

#### E-strategy

- Bring collection close to the people (anywhere, anytime)
- largest possible reach of the collection
- The website should reflect successful trends. Rather than thinking solely in terms of the collection or technological possibilities, we must identify ways of reaching the public.
- The website must be "lean and mean", like an app.
- It must be possible to find and share information quickly and easily
- Other platforms should be used where possible rather than building everything ourselves.
- It must be possible to manage and present content regardless of device or screen resolution.

E-strategy

# Open -> FAIR GLAM

A binary approach (open vs closed) is by now way too limited

Collections are too diverse and many

A more nuanced approach is necessary to deal with reality

FAIR is a concept coming from Open Science : Findable – Accessible – Interoperable – Re-usable

**NEED FOR A DIFFERENT APPROACH**

**RIJKS MUSEUM**

# 2021

Third version digital strategy (integrated / every sector in the museum)

Post-pandemic & first post-digital\* strategy - \* *Ross Parry*

RIJKS MUSEUM

# Information and Data Policy Rijksmuseum

## Summary

The Rijksmuseum links individuals with art and history. Widely sharing information and data makes these links between people, art and history possible. The Rijksmuseum's Information & Data Policy is therefore intended to facilitate the sharing of information and data about our collections with as many people as possible.

The Rijksmuseum strives to make information and data about the collections findable, accessible, understandable and reusable. The information and data are as open as possible, and as closed as they need to be. This is to ensure that we comply with information and data protection legislation. With this policy we want to indicate that we will always try to share as much information and data as possible, even though not everything will be immediately public. We do this because the Rijksmuseum's collections are for everyone.

## Management

Data-driven decisions

## Digital & Marketing

Data-driven campaigns

## Information specialists

Focus on contextualisation

## Website builders

Faster development through standardization

## Designers

Data-driven design

## Curators

Capable of sharing data and stories better

Inspired by a slide from Chris Dijkshoorn
